
SERVICE & PREVENTATIVE MAINTENANCE

Vinco Automation's installation group offers the highest quality service

We are well equipped with all the tools required to complete a quality installation. Our group consists of dependable and dedicated personnel with years of hands-on experience that you can trust to complete your installation in a timely and efficient manner. An important aspect of our service/installation group is that many of our technicians have the unique expertise that combines both mechanical and PLC programming capabilities.

We offer the following services:

- Mechanical and electrical installation
- Installation supervision and commissioning
- Repair and maintenance
- Start-up assistance
- Troubleshooting
- Systems integration
- Customer support
- Engineering studies
- Production support
- Equipment relocation
- Maintenance audits
- Machine and/or line audits
- Machine and/or line optimization
- Maintenance personnel training
- Production personnel training
- Reach out programs
- Preferred maintenance program (PMP)
